PROJECTS

JOBSINC / *expressjs, Nextjs, Whatsapp Integration, AI, Rabbit MQ, Postgresql*

Jobsinc is a streamlined recruitment platform integrating job postings, applicant tracking, and automated CV analysis using AI. It enhances hiring efficiency by automating candidate evaluation, extracting insights, and providing intelligent feedback. With features like message queues and whatsapp integration, JobSync bridges the gap between recruiters and candidates for smarter hiring.

LMS / *Nodejs and express for backend, React/Nextjs for frontend, Redis and Mongodb databases*

A complete complex Full Stack Application I built using a number of technologies. It uses advanced caching using Redis, Social Auth using providers, Web Sockets for real time notification system, Scheduled jobs using cron and Stripe payment gateway integration along with multi user roles. UI is very well designed, contains dynamic graphs and supports light and dark themes. Project code is available at Github.

VIDEOTUBE / *Nodejs and express for backend, React/Nextjs for frontend, Mongodb database*

A Complete Full Stack Video Sharing Platform with numerous functionalities, this project covers MERN and nextjs concepts. It includes all modern techniques like jwt tokens for auth, mongodb aggregation pipelines in the backend while shadcn and other ui libraries for frontend. The complete code is available on Github.

E-Commerce / *Nodejs and express for backend, React/Nextjs for frontend, Mongodb database*

A Complete Full Stack Ecommerce store. It uses mongodb for database and contains all the functionalities of an E-commerce store like User roles, product listings, Orders and payment through Stripe. The complete code is available on Github.

EXPERIENCES

FullStack Developer at IVY(Nest + React) | Mar 2025-Ongoing

Software Engineer at Virtuosoft | May 2024- Ongoing

TECHNICAL SKILLS

- MERN
- NEXT JS
- Python
- SQL DATABASE

➤ **NOSQL DATABASE**

➤ **Github**
